DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to process of manufacturing a semiconductor device by supplying a reaction gas, classified in class 438, subclass 758.
 - II. Claims 7-14, drawn to process of manufacturing a semiconductor device by supplying reaction gas, classified in class 438, subclass 758.
 - III. Claims 15-20, drawn to process of manufacturing a semiconductor device by supplying a sputtering gas, classified in class 438, subclass 758.
 - IV. Claims 21-30, drawn to process of manufacturing a semiconductor device by effecting a process on the substrate under a pressure reduced state, classified in class 438, subclass 758.
 - V. Claims 31-47, drawn to process of manufacturing a semiconductor device by applying a beam from the beam generation source to the processing chamber, classified in class 438, subclass 758.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I -V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions utilize different processes in manufacturing a semiconductor device and are separate

inventions; they need not be used in conjunction with one another and are not capable of being used together.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and so on, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
